## Career Objective

---

Computer Science undergraduate passionate about Enterprise Applications, SAP Solutions, Backend Development and Software Engineering. Skilled in Python, Java and Generative AI with experience developing scalable applications, analyzing technical problems and collaborating across teams. Seeking to contribute to enterprise IT solutions, application support and digital transformation initiatives.

## Education

---

|                                                                                                         |                                |

## Skills

---

**Languages:** Python, Java, JavaScript, SQL, C

**Web & Tools:** HTML5,CSS

**Core Concepts:** Data Structures and Algorithms (Basic), Object Oriented Programming

**Technologies:** Generative AI, Prompt Engineering, LLMs, Product/Operations Management

**Developer Tools:** Git, GitHub, VS Code, Slack, Notion, Excel

**Currently Learning:** REST APIs, Flask, Pandas, NumPy, Scikit-learn

## Projects

---

- **TRUECREDS** - Advanced Credential Validation and Storage
  - Developed an AI-powered credential verification platform to analyze the authenticity and credibility of certificates and projects. Built a Scalable verification workflow, using BlockDAG-inspired architecture for secure and scalable credential storage. Improved document validation efficiency through automated analysis while reducing manual verification effort.
- **Ai Media Generation**
  - Engineered high-quality prompts for Generative AI models to produce cinematic scenes and AI-generated visual content. Collaborated with clients to transform creative requirements into production-ready AI media.

## Internships

---

- **AI Content and Talent Manager** **Eye Media Solutions**  
Managed strategic partnerships and talent acquisition for multiple digital marketing campaigns. Coordinated cross-functional teams using Slack and Notion. Improved project communication and operational workflow management. Supported issue resolution and coordinated communication between multiple stakeholders to ensure smooth project execution.
- **AI Intern** **Flyrank AI**  
Developed backend services supporting AI applications and internal platforms. Designed and maintained APIs for seamless communication across application components. Worked with databases to manage application data efficiently and ensure data consistency. Improved backend performance through debugging, code optimization, and scalable software design.

## Extra Curricular

---

- **Finalist and Presenter, TECH EXPO 2K25** **PSIT KANPUR**  
Showcased our project - TrueCreds (Advanced Credential Validation and Storage) in the annual Tech Expo of our college. Got hands on experience and got a chance to meet and get guidance from specialised industry experts and trainers.
- **Finalist, Axis Hacksprint by UNSTOP** **Axis College, KNP**  
Showcased our project - TrueCreds (Advanced Credential Validation and Storage) in Axis College Of Engineering. The positive feedback from incredible mentors of Oracle and Microsoft were invaluable.
- **Joint-Secretary, IGNITIA 2K26** **PSIT KANPUR**  
Selected to the core leadership team, responsible for the end-to-end Project execution and Stakeholder management of the college's annual technocultural fest, managing tasks and coordinating between multiple sub-committees. Acting as a primary liaison between the college administration, student clubs and external vendors to streamline event approvals and resource allocation.
- **Treasurer, Navrang Club** **PSIT KANPUR**  
Working towards proper management of club's finances and appropriate usage of funds for smoother conduction of events.

## Certifications

---

- **SAP ERP Certified Generative Ai Developer - SAP ([view](#))**
- **Generative Ai Professional - ORACLE OCI ([view](#))**
- **Product Management - Great Learning ([view](#))**
- **Siemens Mobility - Project Manager Job Simulation ([view](#))**
- **AWS Solutions Architect Job Simulation – Amazon AWS ([view](#))**
- **TCSion Yuva For Ai ([view](#))**
- **TCSion Career Edge - Young Professional ([view](#))**
- **Electronic Arts - Product Management Simulation ([view](#))**
